GBC Foton 30 Automatic Laminator

Revolutionising Office Lamination

The GBC Foton 30 Automatic Laminator is a groundbreaking office tool, revolutionising the lamination process with its fully automatic system. Designed to simplify and expedite the lamination of documents, it's perfect for both schools and offices. This innovative laminator can handle up to 30 A4 or A3 documents simultaneously, automatically feeding, laminating, and trimming them. This seamless operation is a significant leap in efficiency, saving up to 98% of your time compared to traditional laminators.

Unmatched Convenience and Precision

Convenience is at the core of the Foton 30. Its automatic film detection system intelligently adjusts to the film thickness, ensuring perfect lamination every time without manual intervention. The machine's automatic paper alignment system further guarantees perfectly aligned documents, delivering professional-quality lamination with ease.

Versatility and Performance

The GBC Foton 30 stands out for its versatility. It accommodates three different film thicknesses – 75, 100, and 125 microns – offering varied levels of document protection. It can process documents up to 297mm wide, including A4, A3, and banners, and features a manual mode for laminating heavy-weight paper or non-standard shapes up to 250gsm. This range of options ensures that the Foton 30 meets diverse lamination needs with exceptional performance.
